

behavior & inequality

briq was founded in 2016 and is headed by Professor Armin Falk. The research focuses on understanding individual decision making and behavior, as well as the causes and consequences of inequality. A particularly important research interest is early childhood development and the formation of socio-emotional and cognitive skills.

Moreover, briq provides a platform for top-level researchers in behavioral economics and inequality by running a visitors program, workshops, conferences and summer schools. For further information on the institute, please refer to www.briq-institute.org.

We invite applications for a position as

Student Helper

in Economic Research (9–19 hours / week).

Job profile

- Research assistance,
- preparation and planning of experiments,
- data analysis and processing,
